Key Change:

To enrol in **UETDRMP007 – Perform Rescue from a Live Low Voltage Panel**, students must provide evidence of any one (1) of the following current units of competency (UoCs) or equivalent qualifications. Call or email us for the full list of Pre-requisite or equivalent Unit of Competencies:

- UEECD0007 – Apply work health and safety regulations, codes, and practices in the workplace
- UETDREL006 – Work safely in the vicinity of live electrical apparatus as a non-electrical worker **(We offer this every Thursday)**

Important: Those holding an existing ESI or Electrotechnology qualification or equivalent already meet the pre-requisite requirements.

Plan ahead to meet the new requirements!

Why do I need a VOC?

If a company you work for, or a work-site you are visiting, requests a current VOC for a specific piece of plant or to undertake a particular task, you will need to comply with the request in order to undertake the work.

Do VOC's expire?

The industry standard for verification of competency re-assessment is typically biennial (every two years). As an RTO we do not govern or regulate your individual or organisational policies or procedures and the requirement for Verification of competency Assessment is set out by the employer, principal contractor, authority or PCBU. For this reason, we currently don't have expiry dates on the VOC's that we issue however the date of issue will be printed on the certificate or wallet card.
